

## INDEX OF SUBJECTS

### A

- ABO blood groups
  - immunostaining methods and, for identification of mixed-up specimens, 665
  - von Willebrand factor and ristocetin-induced platelet aggregation and, 551
- Absolute lymphocyte counts, simultaneous determination of CD4+ lymphocyte counts and, in peripheral blood, 206
- Acanthamoeba, filter-culture technique for diagnosis of, using amoeba saline transport media, 682
- Acquired immunodeficiency syndrome
  - bacterial infections in, 787
  - bone marrow examination in, 589
  - cat-scratch disease in, 236
  - comparison of antemortem and postmortem findings in, 537
  - Encephalitozoon cuniculi* peritonitis in, 532
  - epithelioid angiomatosis in, 532
  - HIV and EBV antigens in, persistent generalized lymphadenopathy and, 729
  - peripheral blood leukocytes in, immunophenotypic analysis of, 300
  - plasma cell malignancy and, 222
  - risk factors for, impact in acquiring mycobacterial and other opportunistic infections and, 556
- Activated partial thromboplastin time test
  - heparin levels in elderly anticoagulated males and, 550
  - whole blood, 549
- Adenocarcinoma
  - endometrial, flow cytometric analysis of, 530
  - immunohistochemical overlap with malignant mixed müllerian tumor, 530
  - of lung, immunohistochemical study of, using monoclonal antibody for 60-kilodalton antigen, 150
  - in malignant effusions, monoclonal antibody B72.3 as adjunct in diagnosis of, 536
  - mediastinal, lymphoepithelial cystic lesion related to, 808
  - metastatic, identification of primary site of, 537
  - papillary, mucin-producing, immunohistochemical study of, using monoclonal antibody for 60-kilodalton antigen, 150
  - polymorphous, low-grade, of seromucous glands, of nasopharynx, 104
  - of salivary gland, polymorphous low-grade, polymorphous, low-grade, clinicopathologic and comparative immunohistochemical study of, 523
  - signet ring cell, 509
  - small bowel, with long-standing regional ileitis, 526
- Adenoid cystic carcinoma
  - clinicopathologic study of, with flow cytometric analysis, 711
  - pulmonary, primary and metastatic, primary and metastatic, use of fine-needle aspiration in management of, 535
- Adenoma
  - colorectal, relationship with carcinomas of anal canal, 531
  - parathyroid, mitotic activity and other morphologic parameters in, 523
  - pleomorphic, of salivary gland, glial fibrillary acidic protein expression in, 523
- renal, cytogenetic characterization of, 408
- syringomatous, of nipple, 692
- thyroid, follicular, distinguished from papillary thyroid carcinoma, keratin 19 expression and, 654
- Adenovirus infection, fatal, in premature neonate, *in situ* hybridization for detection of, 553
- Adriamycin, effect on mitochondrial pyruvate dehydrogenase activity, 522
- Adult respiratory distress syndrome, regional alveolar damage and, 10
- Aggregometer, optical, platelet count as determinant of aggregation response in, 545
- AgNOR, in breast lesions, 518
- AIDS-related complex
  - bone marrow examination in, 589
  - peripheral blood leukocytes in, immunophenotypic analysis of, 300
- Albuminuria, low-level, automated Behring nephelometer for determination of, 540
- Alpha-fetoprotein, elevation of, in primary liver neoplasms of childhood, 527
- Alveolar damage
  - diffuse, 10
  - regional, 10
- Amidolytic assays, for protein C, 210
- Amniotic fluid analysis, monocyte monolayer assay for predicting severity of hemolytic disease and, 89
- Amoeba saline transport media, filter-culture technique using, for diagnosis of *Acanthamoeba* keratitis, 682
- Amphetamine(s), detection by thin-layer chromatography and fluorescence polarization, 544
- Amphetamine congeners, detection by thin-layer chromatography and fluorescence polarization, 544
- Amyloid goiter, after kidney transplantation, systemic amyloidosis and Muckle-Wells syndrome and, 821
- Amyloidosis
  - renal, morphologic and clinical correlations of, 532
  - systemic, amyloid goiter and arthritides after kidney transplantation and, 821
- Anal canal, carcinomas of, clinicopathologic spectrum of, 531
- Anal condylomata, with *in situ* hybridization, human papillomavirus DNA determination of, 16
- Analytic artifact, hematology specimen characteristics and, 295
- Analytic error, hematology specimen characteristics and, 295
- Analytic goals, common hematologic laboratory quantities and, in elderly, 465
- Analytic variation, of common hematologic laboratory quantities, in elderly, 465
- Anatomic pathology Q-probe modules, pilot study of, 539
- Anemia, folate-deficiency, among pregnant females in rural Haiti, 545
- Aneuploidy, in endometrial adenocarcinoma, as prognostic factor, 530
- Angiogenesis, endothelial cells and, 241
- Angiomatosis, epithelioid, in AIDS, 532
- Angiomyolipoma, retroperitoneal, massive, 805
- Angioplasty, successful and unsuccessful, histologic correlates of, 525
- Anisakiasis, intestinal, 251
- Anti-A<sub>1</sub>, in blood group A<sub>2</sub> patients, 709
- Antibodies
  - anti-neutrophil, in Wegener's granulomatosis, 557
  - anti-ubiquitin, in systemic lupus erythematosus and scleroderma, 556

- Anemia, folate-deficiency, among pregnant females in rural Haiti, 545
- Aneuploidy, in endometrial adenocarcinoma, as prognostic factor, 530
- Angiogenesis, endothelial cells and, 241
- Angiomatosis, epithelioid, in AIDS, 532
- Angiomyolipoma, retroperitoneal, massive, 805
- Angioplasty, successful and unsuccessful, histologic correlates of, 525
- Anisakiasis, intestinal, 251
- Anti-A<sub>1</sub>, in blood group A<sub>2</sub> patients, 709
- Antibodies
  - anti-neutrophil, in Wegener's granulomatosis, 557
  - anti-ubiquitin, in systemic lupus erythematosus and scleroderma, 556

- blood group, positive direct antiglobulin test result in dialysis patients and, 214
- to human ribosomal P protein, in systemic lupus erythematosus, multiple sclerosis, and Sjögren's syndrome, 557
- against muscle specific actin and desmin, comparison of, 533
- Mycoplasma pneumoniae*, serologic methods for measurement of, 342
- polyclonal, peroxidase antiperoxidase, avidin-biotin peroxidase complex and peroxidase-labeled avidin-biotin methods and, 62
- quality control in immunohistochemistry and, 844
- Anticoagulant treatment, methods for determination of prothrombin time and, 321
- Antidepressants, tricyclic, monitoring of, by high-pressure liquid chromatography, 544
- Anti-Form, positive direct antiglobulin test result in dialysis patients and, 214
- Antigen excess, immunoturbidimetric detection of, 540
- Anti-neutrophil antibodies, in Wegener's granulomatosis, 557
- Antiphospholipid syndromes, 550
- Anti-ubiquitin antibodies, in systemic lupus erythematosus and scleroderma, 556
- Apolipoprotein(s)
- immunoturbidimetric assays of, effects of choice of serum or plasma and of repeated freezing and thawing on, 540
  - low-density lipoprotein cholesterol and, after HMG CoA reductase inhibitor treatment, 479
- Argyrophilic nucleolar organizer region counts, in breast carcinoma, Ki67 scores and, 401
- Arteriovenous malformations, of small intestine, in Protein S deficiency, 374
- Arthritides, after kidney transplantation, systemic amyloidosis and Muckle-Wells syndrome and, 821
- Astrocytosis, lipocortin-1 immunoreactivity in lesions with, 424
- Attitudes, professional, toward autopsy, 673
- Atypical lobular hyperplasia, fine-needle aspiration of, 22
- Autologous blood predeposit, 484
- Automated optoelectronic reticulocyte counter, 57
- Automation
- assay system for luteinizing hormone and follicle-stimulating hormone and, on IMx, 541
  - Behring nephelometer for determination of low-level albuminuria and, 540
  - of blood counts, in neonatal intensive care unit, 544
  - cyanide-containing and cyanide-free methods and, for whole blood hemoglobin, 286
  - of hematology, hematology specimen characteristics and, 295
  - immunochemical, assessment of estrogen and progesterone receptors by, 529
- Autopsy
- bacterial infections in AIDS and, 787
  - current status of, in academic medical centers, S31
  - pathology education and, S9
  - professional attitudes toward, 673
- Autopsy quality assurance program, identification of clinical quality assurance issues via, 539
- Avidin-biotin peroxidase complex, sensitivity and detection efficiency of, 62
- B**
- Bacterial endotoxin, inactivation by lipoproteins, 522
- Basal cell carcinoma, recurrent, histologic evolution of, 523
- B blood group, rare subgroups of, 551
- BCL-2 oncogene rearrangement, in diagnosis of malignant lymphoma, 546
- Behring nephelometer, for detection of low-level albuminuria, 540
- Bence Jones proteinuria, comparison of high-resolution electrophoresis and immunoelectrophoresis as screen for, 541
- Benign prostatic hyperplasia, serum prostate-specific antigen and for follow-up and after treatment with flutamide, 543
- prostate pathology and, simple prostatectomy and, 760
- Benign tumors, malignant tumors versus, argyrophilic nucleolar organizer region counts and Ki67 scores and, 401
- Beta-2-microglobulin, in breast cancer, 339
- Biopsy(ies)
- of brain, stereotactic, in diagnosis of metastatic carcinoma, 534
  - fine-needle aspiration
    - ductal carcinoma *in situ* and infiltrating ductal carcinoma of breast and, 736
    - of metastatic neoplasms, in breast, 27
    - transbronchial, 36
    - use of specimens in DNA flow cytometry, 535  - gastric, *Campylobacter pylori* and other urease positive bacteria in, 396
  - small, rapid freezing of, 51
  - standards and, for cryosectioning and x-ray microanalysis, 51
- Biotin-streptavidin system, heightened sensitivity of quantitative ELISA for IgM rheumatoid factor and, 630
- Biotinylated DNA probes
- detection and typing of human papillomaviruses with, 604
  - with *in situ* hybridization, 530
  - detection of messenger RNA in routinely processed tissue sections with, 166
- Bleomycin, nodular toxicity of, 101
- Blood
- autologous predeposit of, 484
  - designated transfusion of, 484
  - peripheral
    - leukocytes of, immunophenotypic analysis of, at different stages of HIV infection, 300
    - in monocytoid B-cell lymphoma, 228
    - morphologic changes in, after high-dose recombinant human granulocyte colony-stimulating factor chemotherapy, 280
    - simultaneous determination of absolute total lymphocyte and CD4+ lymphocyte levels in, by flow cytometry, 206
    - use in liver transplantation, 551
- Blood components, use in liver transplantation, 551
- Blood counts, automated, in neonatal intensive care unit, 544
- Blood culture
- collection of samples for, recommendations for, compliance with, 552
  - parallel clinical evaluation of hypertonic medium compared with resin media, 552
- Blood lymphocytes, detection of cytomegalovirus and Epstein-Barr virus in, with DNA probes, 553
- Blood transfusions, individualized care and, 516
- Blood vessels, endothelial cells and, 241
- Bone, congenital fibromatosis of, 534
- Bone cyst, solitary, of radius, containing Liesegang's rings, 831
- Bone marrow
- changes in, in AIDS and ARC, 589
  - in connective tissue disease, 650
  - in cutaneous T-cell lymphoma, 747
  - DNA form, purification and amplification using polymerase chain reaction, 547
  - in lepromatous leprosy, nongranulomatous involvement of, 797
  - in monocytoid B-cell lymphoma, 228
  - plasma cell abnormalities in, of HIV positive patients, 548
  - transplantation of, allogeneic, cytogenetic studies after, technical considerations in, 549
  - with unique morphology, in heritable immunodeficiency, 549
- Bone marrow agar clot section, advantage of, 545
- Brain biopsy, stereotactic, in diagnosis of metastatic carcinoma, 534
- Brain lesions, serum creatine kinase isoenzyme BB as indicator of size of, 542

## Breast

- AgNOR and Ki-67 in lesions of, 518
  - atypical hyperplasia versus carcinoma *in situ* of, immunocytochemical differentiation of, 527
  - carcinoma *in situ* of, hormone receptor assay in, 528
  - carcinoma of, medullary, associated with monoclonal gammopathy, 541
  - cytologic evaluation of lumpectomy margins in, 521
  - ductal carcinoma *in situ* and infiltrating ductal carcinoma of, fine-needle aspiration biopsy of, 736
  - fine-needle aspiration and, of lobular carcinoma *in situ* and atypical lobular hyperplasia, 22
  - leiomyosarcoma of, primary recurrent, 500
  - metastatic neoplasms in, fine-needle aspiration of, 27
  - needle localization specimens from, mammographic and gross pathological analysis of, 452
  - syringomatous tumor of nipple and, 692
- Breast cancer
- correlation of estrogen and progesterone receptors with histologic differentiation in, 528
  - estrogen receptors in
    - anti-immunoperoxidase labeling of nuclei and, 522
    - automated immunochemistry in assessment of, 529
    - immunohistochemical assay for, in paraffin-embedded tissue, 528
  - fine-needle aspiration of, 27
  - hormone receptors in, immunocytochemical quantitation versus cytosol assays of, 527
  - immunocytochemical evaluation of progesterone receptor in, 528
  - kinetics of, argyrophilic nucleolar organizer region counts and Ki67 scores and, 401
  - node-negative, flow cytometric DNA analysis in, 521
  - over-expression of *erbB-2* protein in, mortality rate and, 529
  - progesterone receptors in
    - automated immunochemistry in assessment of, 529
    - immunohistochemical detection of, 528
  - tumor and serum beta-2-microglobulin expression in, 339
- Breast carcinoma
- ductal
    - in situ*, infiltrating ductal carcinoma compared with, 736
    - infiltrating, ductal carcinoma *in situ* compared with, 736
  - metastatic, distinguishing, gross cystic disease fluid protein-15 in, 529
  - with positive results for melanoma marker (HMB-45), 491
  - primary, heterogeneity of estrogen receptor in, evaluated by computed image analysis, 559
  - medullary, associated with monoclonal gammopathy, 541
- Breast lesions, nonpalpable, histopathology of, 527
- Bronchiolar epithelial cell, nonciliated, monoclonal antibody for 60-kilodalton antigen in, lung adenocarcinoma and, 150
- Bronchiolitis obliterans, Epstein-Barr virus-associated, in heart-lung transplant recipients, 177
- Bronchoalveolar lavage specimens, obtained for *Pneumocystis carinii* pneumonia, use of dithiothreitol in, 556
- Budd-Chiari syndrome, in acute promyelocytic leukemia, microgranular variant of, 366
- Bullet residue, cytologic evaluation of, 521
- Burns, severe, viral infection and, 552

## C

- Calcitonin messenger RNA, detection in routinely processed tissue sections, with biotinylated oligonucleotide probes, 166
- Calcospherites, solitary bone cyst of radius containing, 831
- Campylobacter pylori*
  - in gastric biopsies, 396
  - staining methodologies for, 552

## Cancer

- cervical
    - endocrine cell hyperplasia and, 825
    - identifying high-risk precursors of, 379
  - of colon
    - hematologic data in, at presentation, 544
    - small cell and related types, 526
  - colorectal
    - nonpolyposis, familial and sporadic, histologic features of, 526
    - relationship with carcinomas of anal canal, 531
  - of lung
    - non-small cell, tumor-infiltrating lymphocytes from, lymphokine-activated killer cell activity in, 435
    - overlap of nuclear diameters in cells of, 524
- Cancer: of breast
- correlation of estrogen and progesterone receptors with histologic differentiation in, 528
  - ductal
    - in situ*, infiltrating ductal carcinoma compared with, 736
    - infiltrating, ductal carcinoma *in situ* compared with, 736
  - estrogen receptors in
    - anti-immunoperoxidase labeling of nuclei and, 522
    - automated immunochemistry in assessment of, 529
    - immunohistochemical assay for, in paraffin-embedded tissue, 528
  - fine-needle aspiration of, 27
  - hormone receptors in, immunocytochemical quantitation versus cytosol assays of, 527
  - kinetics of, argyrophilic nucleolar organizer region counts and Ki67 scores and, 401
  - metastatic, distinguishing, gross cystic disease fluid protein-15 in, 529
  - node-negative, flow cytometric DNA analysis in, 521
  - over-expression of *erbB-2* protein in, mortality rate and, 529
  - with positive results for melanoma marker (HMB-45), 491
  - primary, heterogeneity of estrogen receptor in, evaluated by computed image analysis, 559
  - progesterone receptors in
    - automated immunochemistry in assessment of, 529
    - immunohistochemical detection of, 528
  - tumor and serum beta-2-microglobulin expression in, 339
- Cancer chemotherapy
- bleomycin toxicity and, pulmonary nodules and, 101
  - with recombinant human granulocyte colony-stimulating factor, peripheral blood morphologic changes after, 280
- Carcinoembryonic antigen, in carcinoid tumors of gastrointestinal tract, significance of, 525
- Carcinoid tumors
- duodenal, clinicopathologic study of, 525
  - endocrine cell hyperplasia of cervix and, 825
  - flow cytometric DNA analysis of, 526
  - of gastrointestinal tract, significance of CEA in, 525
  - rectal, clinicopathologic study of, 525
- Carcinoma
- adenoid cystic
    - clinicopathologic study of, with flow cytometric analysis, 711
    - pulmonary, primary and metastatic, use of fine-needle aspiration in management of, 535
  - adnexal, microcystic, of nipple, 692
  - of anal canal, clinicopathologic spectrum of, 531
  - basal cell, recurrent, histologic evolution of, 523
  - of breast
    - ductal, *in situ*, infiltrating ductal carcinoma compared with, 736
    - medullary, associated with monoclonal gammopathy, 541
    - metastatic, distinguishing, gross cystic disease fluid protein-15 in, 529

- with positive results for melanoma marker (HMB-45), 491
- primary, heterogeneity of estrogen receptor in, evaluated by computed image analysis, 559
- of colon, small cell and related types, 526
- follicular, distinguished from papillary thyroid carcinoma, keratin 19 expression and, 654
- human head and neck, implanted intraorally in nude mice, effect of 17 $\beta$ -estradiol on, 558
- lobular, mammary, *in situ*, fine-needle aspiration of, 22
- metastatic, stereotactic brain biopsy in diagnosis of, 534
- nerve growth factor receptor and, monoclonal antibody against, 415
- neuroendocrine, endocrine cell hyperplasia of cervix and, 825
- of prostate, metastatic to breast, in diethylstilbestrol treated patients, immunohistologic diagnosis of, 531
- serum prostate-specific antigen and prostate pathology and, simple prostatectomy and, 760
- signet ring cell, lymphoepithelial cystic lesion related to, 808
- small cell
  - endocrine cell hyperplasia of cervix and, 825
  - ovarian, 140
- squamous, with *in situ* hybridization, human papillomavirus DNA determination of, 16
- sweat duct, sclerosing, of nipple, 692
- thyroid, papillary, distinguished from follicular carcinoma and follicular thyroid adenoma, keratin 19 expression and, 654
- of urinary bladder, human papillomavirus and, 531
- Carcinoma *in situ*, of breast
  - ductal, infiltrating ductal carcinoma compared with, 736
  - hormone receptor assay in, 528
  - immunocytochemical differentiation from atypical hyperplasia, 527
- Carcinosarcomas, prostatic, 131
- Cardiac transplant, therapeutic plasma exchange and, in cardiac transplant patient with thromboembolic disorder, 551
- Cast nephropathy, in multiple myeloma, multinucleated cells of, macrophage origin of, 662
- Cat-scratch disease, in acquired immunodeficiency syndrome, 236
- CD4 cells, simultaneous determination of absolute lymphocyte counts and, in peripheral blood, 206
- Cell counter, whole blood aggregation using, 794
- Cell culture
  - decubitus ulcers and, epidermal cells form, impaired migration of, 430
  - for detection of influenza A and B, 487
- Cell cycle analysis, of rectal tumors, by flow cytometry, 526
- Cellulose acetate electrophoresis, M protein measurement and, nephelometer compared with, 93
- Central nervous system
  - lipocortin-1 immunoreactivity in, 424
  - quantitative measurement of HIV-specific immunoglobulin in, 555
- Cervical biopsy, identification of human papillomavirus infection and, *in situ* hybridization with type-specific biotinylated DNA probes and, 530
- Cervical cancer
  - endocrine cell hyperplasia and, 825
  - identifying high-risk precursors of, 379
- Cervical intraepithelial neoplasia, DNA ploidy profiles as prognostic indicators in, 261
- Cervical smears, spindled nuclei in, as diagnostic criterion for human papillomavirus, 536
- Cervix
  - DNA ploidy profiles and, as prognostic indicators in cervical intraepithelial neoplasia, 261
  - papillomavirus infection of, prediction by biopsy morphology, 577
- C-Fos proto-oncogene, over-expression of, in osteosarcoma, 521
- Chemical strip testing, eliminating unnecessary urine microscopy and, 78
- Chemistry analyzers, random access, labor savings on, batch size and, 540
- Chemotherapy
  - bleomycin toxicity and, pulmonary nodules and, 101
  - with recombinant human granulocyte colony-stimulating factor, peripheral blood morphologic changes after, 280
- Children. *See also* Infant(s); Neonate(s)
  - nephrotic syndrome in, immunoglobulin G subclasses in, 68
  - normal, lymphocyte phenotyping in, 548
- Chondroid chordoma, immunohistochemical distinction from class chordoma, 534
- Chordoma, classic and chondroid, immunohistochemical distinction of, 534
- Chromogenic substrate, heightened sensitivity of quantitative ELISA for IgM rheumatoid factor and, with biotin-streptavidin system, 630
- Chromosomal abnormalities, nonrandom, in non-Hodgkin's lymphoma, clonal proliferation and histologic and immunophenotypic subtypes and, 546
- Chromosomes, of renal adenomas, 408
- CK-ISO, comparison with IMACK-MB and ISOMUNE CK, 543
- Classification, of acute nonlymphocytic leukemia, 172
- Clinically useful limits, within-subject variation as basis of, 251
- Clinicopathologic study
  - of duodenal carcinoids, 525
  - of lobular capillary hemangioma, 536
  - of morphologic patterns of monoclonal light-chain related renal disease, 532
  - in polymorphous low-grade adenocarcinoma of salivary gland, 523
  - of rectal carcinoids, 525
- Clomiphene, effect on endometrium, in infertility, 530
- Clonal proliferation, in non-Hodgkin's lymphoma, nonrandom chromosomal abnormalities and, 546
- Clonal T-cell populations, in Sjögren's syndrome, progression to cutaneous pleomorphic T-cell lymphoma and, 357
- Coagulation, endothelial cells and, 241
- Coagulometers, for determination of prothrombin time, comparison of, 321
- Cocaine receptors, in lymphocytes, flow cytometric analysis of, 557
- Colchicine, amyloid goiter and arthritides after kidney transplantation and, systemic amyloidosis and Muckle-Wells syndrome and, 821
- Colon, carcinoma of, small cell and related types, 526
- Colon cancer, hematologic data in, at presentation, 544
- Colorectal adenoma, relationship with carcinomas of anal canal, 531
- Colorectal cancer, nonpolypoid, familial and sporadic, histologic features of, 526
- Colorimetric method, of inorganic phosphate measurement, interference by rate of phosphomolibdate complex formation and, 541

- identification in fixed tissues, comparison of "2G2" and "3F6" monoclonal antibodies for, 556
- Pneumocystis carinii* pneumonia, bronchoalveolar lavage specimens obtained for, use of dithiothreitol in, 556
- Pneumocyte, type II, monoclonal antibody for 60-kilodalton antigen in, lung adenocarcinoma and, 150
- Pneumonia  
  mycotic, in premature infants, 595
- Pneumocystis carinii*, bronchoalveolar lavage specimens obtained for, use of dithiothreitol in, 556
- Pneumonitis, hypersensitivity, with paucity of granulomas, 524
- Polyarteritis nodosa, initially diagnosed in gallbladder resection specimens, 533
- Polyclonal antibodies, in determination of glomerular deposits of hepatitis B virus antigens  
  in hepatitis B virus-associated glomerulonephritides, 159
- peroxidase antiperoxidase, avidin-biotin peroxidase complex and peroxidase-labeled avidin-biotin methods and, 62
- Polymerase chain reaction  
  detection of HIV-1 RNA by, 554
- for detection of human immunodeficiency virus and cytomegalovirus, preparation, interfering substances, and sources of contamination in, 554
- detection of human immunodeficiency virus by, 555
- in infants, 555
- detection of human papillomaviruses using, 554
- prenatal diagnosis of sickle cell anemia and, 347
- purification and amplification of DNA from bone marrow specimens using, 547
- Polymyxin B, inhibition of phospholipid coagulation assays by, 550
- Porphobilinogen, screening tests for, insensitivity of, 644
- Pregnancy  
  folate-deficiency anemia in, in rural Haiti, 545
- neonatal hemochromatosis and, cytoferin and maternofetal iron transport and, 755
- Rh-sensitized, monocyte monolayer assay for predicting severity of hemolytic disease and, 89
- Premature infants, *Malassezia furfur* infection in, 595
- Prenatal diagnosis, of sickle cell anemia, hemoglobin electrophoresis versus DNA analysis in, 347
- Primary leiomyosarcoma, of breast, 500
- Problem-based learning, S23
- Progesterone receptor, in papillary cystic tumor, of pancreas, 572
- Progesterone receptors  
  in breast cancer, automated immunochemistry in assessment of, 529
- correlation with histologic differentiation in, 528
- immunohistochemical detection of, 528
- in hormone-sensitive tumors, correlation with DNA flow cytometry findings and, 529
- Prognosis  
  in B-cell chronic lymphocytic leukemia, correlation of degree of surface immunoglobulin expression with clinical outcome in, 82
- DNA ploidy profiles in, in cervical intraepithelial neoplasia, 261
- in non-Hodgkin's lymphoma, interleukin-2 receptor levels and, 186
- organ transplant and, cytomegalovirus infection and, involving skin, 96
- Propidium iodide, in adenoid cystic carcinoma, 711
- Prostate  
  carcinoma of, metastatic to breast, in diethylstilbestrol treated patients, immunohistologic diagnosis of, 531
- neoplasms of, 131
- serum prostate-specific antigen and pathology of, simple prostatectomy and, 760
- Prostate-specific antigen  
  serum, in benign prostatic hyperplasia, for follow-up and after treatment with flutamide, 543
- simple prostatectomy and, 760
- use of serum, a new perception, 845
- Prostatic duct epithelium, proliferative, histology and immunohistochemistry of, differentiation of prostatic intraepithelial neoplasia from prostatic metaplasia and, 531
- Prostatic intraepithelial neoplasia, histologic and immunohistochemical differentiation from prostatic metaplasia, 531
- Prostatic metaplasia, histologic and immunohistochemical differentiation from prostatic intraepithelial neoplasia, 531
- Prosthetic heart valves, D-dimer measurement and, 551
- Protein(s)  
  effect of formaldehyde on structure of, 538
- erbB-2*, over-expression in breast cancer, mortality rate and, 529
- Tamm-Horsfall, in urine, ELISA method for rapid quantification of, 199

## Protein C

- automated functional assay for, 210
- functional methods for, diagnostic efficacy of, 550

Protein-15, gross cystic disease fluid, distinguishing breast metastatic carcinoma and, 529

Protein S deficiency, arteriovenous malformations of small intestine in, 374

Proteinuria, Bence Jones, comparison of high-resolution electrophoresis and immunoelectrophoresis as screen for, 541

## Prothrombin time

- comparison of methods for determination of, 321
- with North American thromboplastin reagents, international normalized ratios for, derivation of, 124
- whole blood, 549

Pulmonary cytology, transbronchial fine-needle aspiration and, 36

Pulmonary nodules, bleomycin toxicity and, 101

Pyruvate dehydrogenase activity, mitochondrial, effect of adriamycin on, 522

## Q

## Quality assurance

- identification of clinical issues in, via prospective autopsy quality assurance program, 539
- specimen turnaround time and, 613

## Quality control

- in immunohistochemistry, 844
- of multiple instruments, using pooled samples, 539

Quantification, rapid, of Tamm-Horsfall protein, in urine, 199

Q-probe modules, in anatomic pathology, pilot study of, 539

## R

Radiation, endothelial cells and, 241

Radioimmunoassay, for detection of antibody to hepatitis B surface antigen, sensitivity of, 554

Radius, solitary bone cyst of, containing Liesegang's rings, 831

Random access chemistry analyzers, labor savings on, batch size and, 540

Recombinant human granulocyte colony-stimulating factor cytotoxic therapy, peripheral blood morphologic changes after, 280

Recombinogen-HIV-1 LA test, sensitivity and interobserver variability of, 555

## Rectum

- carcinoid tumors of, clinicopathologic study of, 525
- tumors of, DNA ploidy and cell cycle analysis of, by flow cytometry, 526

Reference cells, alteration of DNA index by choice of, 537

Reference values, common hematologic laboratory quantities and, in elderly, 465

Regional alveolar damage, 10

Regional lung injury, 10

Renal adenomas, cytogenetic characterization of, 408

Renal amyloidosis, morphologic and clinical correlations of, 532

Renal disease, monoclonal light-chain related, clinico-pathologic correlation of morphologic patterns of, 532

Reporting, using voice recognition, 544

Reproducibility, of Ivy and Simplate II bleeding time techniques, 315

Resin media, for blood culture, hypertonic medium compared with, 552

Respiratory infections, caused by syncytial respiratory virus, laboratory diagnosis of, 553

## Respiratory syncytial virus

- rapid detection of, by enzyme immunoassay, 553
- respiratory infections caused by, laboratory diagnosis of, 553

Restriction endonuclease analysis, prenatal diagnosis of sickle cell anemia and, 347

Rheumatoid arthritis, bone marrow findings in, 650

Rheumatoid factor, heightened sensitivity of quantitative ELISA for, with biotin-streptavidin system, 630

Rh-sensitized pregnancies, monocyte monolayer assay for predicting severity of hemolytic disease and, 89

Ristocetin-induced platelet aggregation, ABO blood group and, 551

## Rotavirus

- in fetal specimens, latex agglutination and enzyme-linked immunoassay methods for detection of, 637

latex kits for detection of, 251

Routine testing, specimen turnaround time as component of laboratory quality and, 613

## S

## Salivary gland

- adenocarcinoma of, polymorphous, low-grade, clinicopathologic and comparative immunohistochemical study of, 523

adenoid cystic carcinoma of, clinicopathologic study of, with flow cytometric analysis, 711

pleomorphic adenoma of, glial fibrillary acidic protein expression in, 523

Salmonella antigens, rapid latex agglutination test to detect, from gram-negative enrichment broth, 679

Sample collection, whole blood aggregometry and, 676

Sarcoma, differentiation from other spindle cell neoplasms, 566

Schistosomiasis, urinary, eosinophiluria in, 329

Schistocytes, paravalvular mechanical hemolysis and, with normal blood smear, 513

Scleroderma, anti-ubiquitin antibodies in, 556

Sclerosing sweat duct carcinoma, of nipple, 692

Screening tests, for porphobilinogen, insensitivity of, 644

## Sensitivity

- international levels for reporting of prothrombin time results with North American thromboplastin reagents, 124
- of Ivy and Simplate II bleeding time techniques, 315

of peroxidase antiperoxidase, avidin-biotin peroxidase complex, and peroxidase-labeled avidin-biotin methods, 62

of screening tests for porphobilinogen, 644

Seromucous glands, adenocarcinoma of, polymorphous low-grade, 104

Serous cavities, localized fibrous tumor of, 561

## Serum

- alterations of, in chronic muscle disease, 523
- hemoglobin determination in, by first-derivative recording spectrometry, 619

microbial inhibitory activity of, in acute myelogenous leukemia, method of determining, 192

plasma substituted for, improved STAT response time by, 538

Serum protein electrophoresis, M protein measurement and, nephelometer compared with, 93

Set theory, triple-label immunophenotypic analysis of cells and, based upon double-label measurements, 73

Sézary syndrome, marrow involvement in, 747

Shareware library, 251

## Shell vial centrifugation

- for detection of influenza A and B, 487
- detection of rotavirus in fetal specimens and, latex agglutination and enzyme-linked immunoassay methods for, 637

Shigella antigens, rapid latex agglutination test to detect, from gram-negative enrichment broth, 679

Sickle cell anemia, prenatal diagnosis of, hemoglobin electrophoresis versus DNA analysis in, 347

Signet ring cell adenocarcinoma, 509

Signet ring cell carcinoma, lymphoepithelial cystic lesion related to, 808

Silver, immunogold-silver staining by capillary action and, 773

Simplate II bleeding time technique, comparison with Ivy bleeding time technique, 315

#### Sjögren's syndrome

- antibodies to human ribosomal P protein in, 557
- with specific cutaneous manifestations and multifocal clonal T-cell populations, progressing to cutaneous pleomorphic T-cell lymphoma, 357

#### Skin

- cytomegalovirus lesions of, in immunocompromised hosts, 96
- manifestations of Sjögren's syndrome and, progression to cutaneous pleomorphic T-cell lymphoma and, 357

#### Small bowel

- adenocarcinoma of, with long-standing regional ileitis, 526
- arteriovenous malformations of, in Protein S deficiency, 374
- transplant of, in child, morphologic, immunohistochemical, and clinical results of, 686

#### Small cell carcinoma

- of colon, 526
- ovarian, 140

Snake venom, automated functional assay for protein C and, 210

Software publications, 251

Solitary bone cyst, of radius, containing Liesegang's rings, 831

Southern blot analysis, detection and typing of human papillomaviruses with, 604

#### Spectrophotometry

- derivative, hemoglobin determination by, in plasma or serum, 619
- for detection of porphobilinogen, 644
- ultraviolet absorption, absorption of light by cell nuclei and, 659

Squamous carcinomas, with *in situ* hybridization, human papillomavirus DNA determination of, 16

Standard(s), for cryosectioning and x-ray microanalysis, 51

Standardization, quality control in immunohistochemistry and, 836

*Staphylococcus aureus* infection, in AIDS, 787

STAT response time, improvement by substituting plasma for serum, 538

Stat testing, specimen turnaround time as component of laboratory quality and, 613

Stereotactic brain biopsy, in diagnosis of metastatic carcinoma, 534

#### Stomach

- biopsies of, *Campylobacter pylori* and other urease positive bacteria in, 396
- hematogenous metastases to, 525

Strategic information system, S38

Strategic planning, laboratory information system as tool for, S38

Streptococcal infections, alteration of lactate dehydrogenase isoenzyme patterns by, 542

Streptokinase, alteration of lactate dehydrogenase isoenzyme patterns by, 542

Stromal thecosis, of ovary, virilizing, associated with multiple corpora atretica, 505

Stromal tumor, sclerosing, of ovary, ultrastructure and immunohistochemistry of, 530

Surfactant apoprotein, in lung adenocarcinoma, monoclonal antibody for 60-kilodalton antigen compared with, 150

Sustentacular tumors, nerve growth factor receptor and, monoclonal antibody against, 415

#### Syncytial respiratory virus

- rapid detection of, by enzyme immunoassay, 553
- respiratory infections caused by, laboratory diagnosis of, 553

Syringomatous tumor, of nipple, 692

#### Systemic lupus erythematosus

- anti-ubiquitin antibodies in, 556
- antibodies to human ribosomal P protein in, 557
- bone marrow findings in, 650

## T

Talc, in liver tissue, of intravenous drug abusers, with chronic hepatitis, 583

Tamm-Horsfall protein, in urine, ELISA method for rapid quantification of, 199

Tandem-E PSA assay, analytic and clinical performance characteristics of, 543

t(8;21) chromosome, in acute nonlymphocytic leukemia, 172

Teaching, new curriculum for, S23

Technicon H-1 analyzer, in acute leukemia of childhood, 545

Teratoma, placental, 371

Testicular tumors, bleomycin toxicity and, pulmonary nodules and, 101

Thalassemia carrier states, flow cytometric analysis of, 548

Thecosis, stromal, of ovary, associated with multiple corpora atretica, 505

Thin-layer chromatography, detection of amphetamines and amphetamine congeners by, 544

T-helper subsets, in T-cell lymphoproliferative disorder, 547

Thromboembolic disorder, in cardiac transplant patient, therapeutic plasma exchange in, 551

Thromboplastin, reporting of prothrombin time results with, derivation of international normalized ratios for, 124

Thyroid gland, malacoplakia of, 813

Thyroid neoplasms, absorption of ultraviolet light by cell nuclei and, 659

Thyroid-papillary carcinoma, distinguished from follicular carcinoma and follicular thyroid adenoma, keratin 19 expression and, 654

Ticarcillin, microbial resistance to, ward-dependent variation in, 552

Tissue analysis device, breast needle localization specimens and, mammographic and gross pathologic analysis of, 452

Tissue culture, detection of rotavirus in fetal specimens and, latex agglutination and enzyme-linked immunoassay methods for, 637

Tissue-type plasminogen activator assays, in plasma, 308

#### T-lymphocytes

in acute T-cell leukemia, 115

in Kikuchi's lymphadenitis, 42

Total testing process, specimen turnaround time as component of laboratory quality and, 613

Toxicology, forensic, S48

Transbronchial fine-needle aspiration, 36

Transcription, using voice recognition, S44

#### Transferrin

- microbial inhibitory activity of serum in acute myelogenous leukemia and, method for determining, 192
- neonatal hemochromatosis and, 755

#### Translocation

in acute nonlymphocytic leukemia, 172

involving 14q11, non-T-cell lymphoproliferative disorders with, 547

Transport, iron, maternofetal, neonatal hemochromatosis and, 755

*Trichosporon beigelii* infection, disseminated, after orthotopic liver transplantation, 119

#### Tumor(s)

carcinoid

- duodenal, clinicopathologic study of, 525
- endocrine cell hyperplasia of cervix and, 825
- flow cytometric DNA analysis of, 526
- of gastrointestinal tract, significance of CEA in, 525
- rectal, clinicopathologic study of, 525
- hormone-sensitive, correlation between estrogen and progesterone receptors and DNA flow cytometry findings in, 529
- of liver, primary, in children, elevation of alpha-fetoprotein in, 527
- of lung, transbronchial fine-needle aspiration and, 36

- malignant mixed mullerian, immunohistochemical overlap with endometrial adenocarcinoma, 530  
 mediastinal, lymphoepithelial cystic lesion related to, 808  
 nerve growth factor receptor and, monoclonal antibody against, 415  
 rectal, DNA ploidy and cell cycle analysis of, by flow cytometry, 526  
 of seromucous glands, morphologic and immunohistochemical features of, 104  
 stromal, sclerosing, of ovary, ultrastructure and immunohistochemistry of, 530  
 syringomatous, of nipple, 692  
 testicular, bleomycin toxicity and, 101  
 thyroid, absorption of light by cell nuclei and, 659
